SUMMARY

Third-year B.Tech CSE student (CGPA 9.69/10) who ships end-to-end backend, Android, and full-stack web systems and works AI-natively with LLM coding tools. Strong in Java, Python, DSA, and OOP; building REST services with Spring Boot. Seeking a Software Engineering internship for Summer 2027.

EDUCATION

Vellore Institute of Technology (VIT) Vellore, India
B.Tech in Computer Science and Engineering Aug 2024 – May 2028
CGPA: 9.69 / 10.0 (4 semesters) • 3rd Year, 5th Semester Class XII (CBSE): 95.8% • Class X (GSEB): 94.0%

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Computer Architecture, Theory of Computation, Software Engineering (Agile/DevOps)

TECHNICAL SKILLS

Languages	Java, C++, C, Python, JavaScript (ES6+), SQL, HTML5, CSS3
Backend & APIs	Spring Boot (learning), Node.js, Express.js, REST API design, JSON, JDBC, Postman
Frontend	React.js, React Router, Hooks, Responsive CSS (Flexbox, Grid)
Mobile	Android SDK (Java), Bluetooth Low Energy (BLE), SQLite, Firebase (Auth, Realtime DB)
Databases	MySQL, SQLite, Firebase Realtime DB; schema design, normalization, indexing
DevOps & Tools	Git, GitHub, Docker, Kubernetes, Jenkins, CI/CD, Linux (CLI), IntelliJ IDEA, Android Studio, VS Code
AI-Assisted Dev	Claude Code (IntelliJ), LLM-assisted prototyping, debugging & code review

PROJECTS

MeshSOS — Offline Peer-to-Peer Emergency Network **Feb 2026 – Present**
Java, Android SDK, BLE, SQLite, Firebase github.com/EklavyaGoyal17/MeshSOS

- Built a native **Android** app that relays distress messages device-to-device over **Bluetooth Low Energy**, staying fully functional with no cellular or Wi-Fi connectivity.
- Implemented BLE advertising/scanning with a custom packet format and TTL-based forwarding, reaching peer discovery at **~50 m** and **3-hop** relay in field tests.
- Designed an offline-first **SQLite** layer that queues GPS coordinates and payloads locally and syncs to **Firebase** on reconnect, preventing message loss.
- Shipped a high-contrast accessible UI with runtime localization and a hands-free voice trigger, cutting time-to-send an SOS to **under 3 seconds**.

Smart City Indoor Air-Quality Platform **Mar 2026**
React.js, Node.js, Express.js, REST API, C++, ESP32 github.com/EklavyaGoyal17/SmartCity-IAQ-Node

- Developed a **full-stack** IoT platform aggregating live telemetry from multiple sensor nodes into a **React.js** dashboard served by a **Node.js/Express REST API**.
- Programmed an **ESP32** in **C++** to sample an MQ-135 sensor every **5 s** and actuate a 5V ventilation relay when AQI crossed a configurable threshold.
- Integrated the **Open-Meteo API** to overlay 6+ weather parameters on readings, and tuned the JSON-over-HTTP pipeline to **sub-2s** sensor-to-dashboard latency on LAN.

Containerized CI/CD Deployment Pipeline **2026**
Docker, Kubernetes, Jenkins, Git, Grafana github.com/EklavyaGoyal17/techportal

- Containerized a multi-service web application with **Docker** and authored declarative **Kubernetes** manifests (Deployments, Services) for reproducible rollout.
- Automated build, test, and deploy through a **Jenkins** declarative pipeline triggered on Git commits, replacing manual deployment with a single repeatable workflow.
- Instrumented the deployment with **Grafana** dashboards and health checks to surface service availability and resource metrics post-release.

CERTIFICATIONS & ACHIEVEMENTS

- DevOps, Agile and Design Thinking** — IBM Career Education Program, IBM Developer Skills Network Jul 2026
- Problem Solving: 150+ DSA problems** solved on LeetCode (arrays, strings, trees, graphs, dynamic programming, sliding window); **5-star HackerRank** badges in **Java, Python, and SQL**.
